

WHO Drug Information

Contents

General Policy Topics

Drug regulation and developing countries 1

Reports on Individual Drugs

Iron deficiency and developmental retardation 4

Vitamin A deficiency and abnormal T-cell subsets 5

Ivermectin: a protective effect against onchocercal optic neuropathy? 6

Artesunate/mefloquine in acute uncomplicated falciparum malaria 7

Haemophilus influenzae vaccines: a third generation in prospect? 9

Pertussis: a rationale for adult vaccination? 11

Second-generation pneumococcal vaccines 12

Beta-blockers and depression 14

Immune globulins and nosocomial infections 16

Inhaled corticosteroids reduce mortality from asthma 18

Antidepressant drugs and the risk of suicide 18

General Information

Multidrug-resistant tuberculosis: a time for coordinated action 21

Psychotropic drugs and pregnancy 23

Multidose vials: a vehicle for disease transmission? 24

New perspectives on food supplements 25

Sponsored symposia: science or veiled promotion? 26

International infrared chemical reference spectra 27

Regulatory Matters

Biotechnology: when are two similar drugs different? 29

Computer-assisted new drug applications 29

Advertising of medicinal products within the European Community 29

Industry-supported scientific and educational activities: a draft policy statement 31

Nonsteroidal anti-inflammatory drugs and severe hypersensitivity 33

Clavulanic acid and cholestatic jaundice 33

DNA-derived factor VIII concentrate 33

Paclitaxel in unresponsive ovarian cancer 35

Essential Drugs

Dysentery 36

Oral rehydration salts 37

Sulfamethoxazole + trimethoprim 38

Ampicillin 39

Nalidixic acid 39

Ciprofloxacin 40

Metronidazole 41
