Contents

General Policy Topics

Socially-responsive development of medicines
II. Antibiotics in eclipse 1

Personal Perspectives

OTC advertising: in whose interest? 10

Reports on Individual Drugs

Commensal enterobacteria and prevention of
rotavirus diarrhoea 14

Saccharomyces boulardii: a valuable adjunct
in recurrent *Clostridium difficile* disease? 15

ACE inhibitors and non-diabetic chronic renal
failure 16

Oral contraceptives and breast cancer: more
insight into a complex association 18

DMPA and breast cancer: a largely
reassuring analysis 20

An antistreptococcal vaccine to prevent
rheumatic fever? 22

Fluconazole and cryptococcal meningitis 23

Corrigendum 24

General Information

Acinetobacter: a paradigm for hospital-
acquired infection 25

Hydroxyurea and sickle-cell disease:
encouraging response in a multicentre study 26

Progress in managing beta-thalassaemia: iron
chelation and beyond 28

Regulatory Matters

Cyproterone acetate and hepatic reactions 30

High-potency pancreatins and bowel strictures 30

Metformin gains approval in USA 30

New requirements for paediatric labelling 32

Pimozide and cardiac arrhythmias 32

HIV test using oral fluid samples 33

Naltrexone approved as an adjunct in the
treatment of alcoholism 33

Use of quinacrine for female sterilization
arouses concern 33

Clozapine and myocarditis 34

Essential Drugs

Rheumatoid arthritis 35

Acetylsalicylic acid 36

Ibuprofen 37

Indometacin 38

Chloroquine 39

Penicillamine 40

Sulfasalazine 40

Methotrexate 41

Prednisolone 42
