REPORT ON ERADICATION OF ANOPHELES GAMBIAE  
FROM UPPER EGYPT, 1942-1945

---

During the Fourth Session of the Interim Commission, at the Committee on Technical Questions, Dr. SHOUSHA Pasha kindly agreed to provide the Expert Committee on Malaria with documentation concerning the eradication of Anopheles gambiae from Upper Egypt.

Dr. SHOUSHA Pasha has now submitted a report on this work, together with a rich collection of photographs illustrating the problem and the programme, and a manual of instructions as followed by the staff entrusted with the eradication work.

The report has arrived too late to be distributed to the Interim Commission in time, but members of the Interim Commission may of course see the graphic documentation brought by Dr. Shousha Pasha. It is proposed to publish his report either in the Bulletin of the World Health Organization or as a separate monograph.
