AGE DETERMINATION OF SOME ANOPHELINE MOSQUITOS BY
DAILY GROWTH LAYERS OF SKELETAL APODEMES

by

Y. Schlein and N. G. Gratz

Page 2, item (6) should read as follows:

"(6) Staining in a ripe solution of 0.2% haematoxylin in 70% ethyl alcohol for 1-2 minutes (under microscopic control to avoid overstaining; about 10 preparations can be stained and observed at a time)."
