THE SYNTHESIS OF ANTIMALARIAL DRUGS

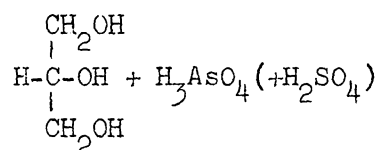

by

Professor O. Y. Magidson

All-Union Institute for Chemo-Pharmaceutical Research, Moscow, USSR

In the document under the above title translated from the Russian original, a certain number of omissions and errors in the chemical formulae were noted. The most important points needing correction are as follows:

1. The original text of the document was in Russian.
2. The correct formula on page 7 (top right) is as follows:

Glycerine Arsenic Acid

3. Figs. No. 1 (page 5) and No. 2 (page 26) are shown in the enclosed pages of this corrigendum.

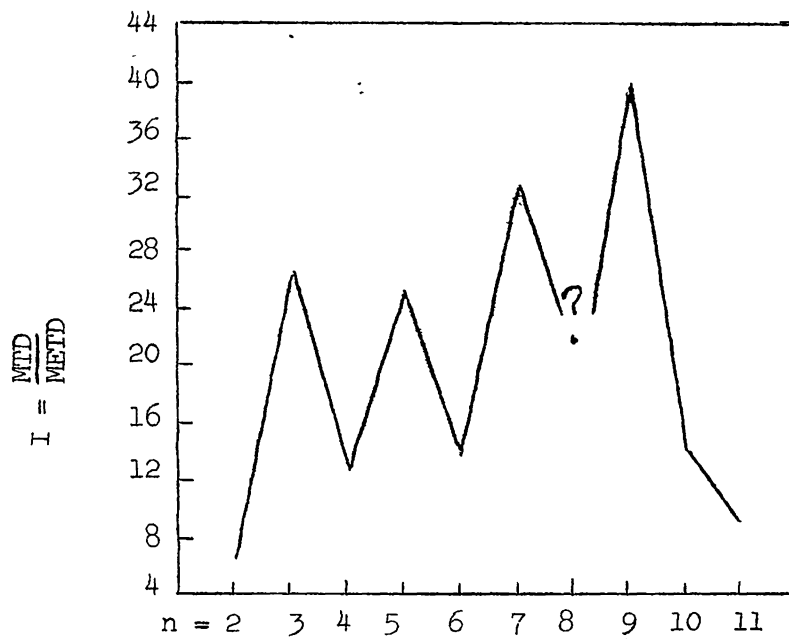

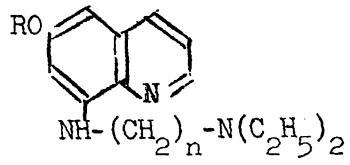

Figure 1. Diagram showing the changes in the chemotherapeutic index in relation to the length of the side-chain.

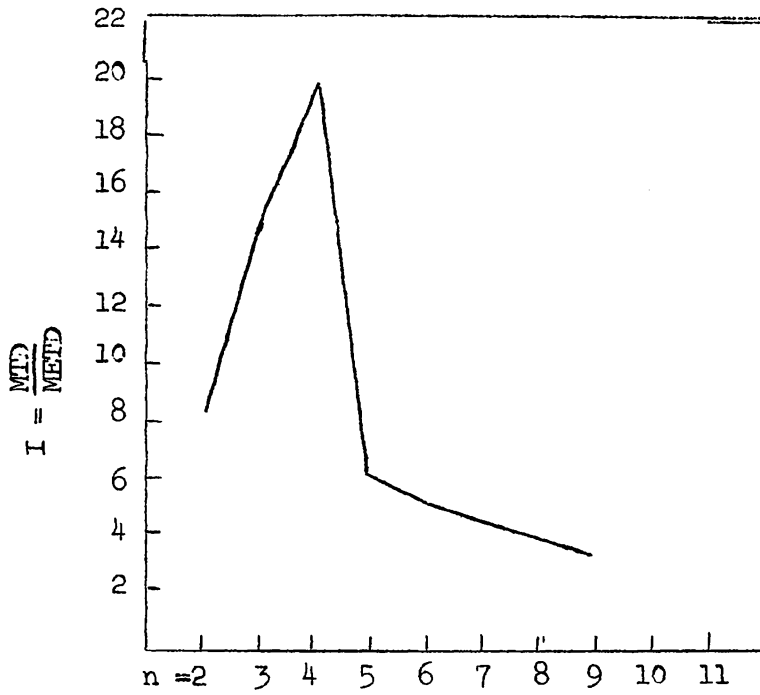

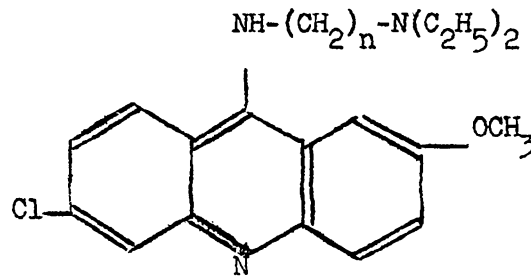

Figure 2. Diagram showing the changes in the therapeutic index in relation to the length of the chain.
