THE APPLICATION OF PYRIMETHAMINE IN RURAL AREAS

ADDENDUM

Dr. I.H. Vincke has informed us that this paper was prepared in collaboration with Dr. PEETERS. Consequently, the name of the latter should be given beneath that of Dr. Vincke on the first page of the document.

Furthermore, the following data should be added on page 6, underneath Table II Kundelugu:

"Three months after the end of Daraprim treatment:

Subjects examined, all ages: 89; positive: 0

Children examined: 21; positive: 0"

Under Table III "Chefferie" of Kirungu Baudouinville (Moba)

"On 20 - 24 July, i.e. rather more than four months after all treatment had ceased, examination of children aged from 4 to 11 gave 1.66% positives among children in the Baudouinville Plateau and 2.71% among children in the Moba Plateau".
