98 health posts, as follows:

Bissau Region	5
Cacheu "	18
Bafatá "	12
Gabú "	12
Tombali "	14
Oio "	24
Buba "	5
Bolama "	8

Vaccination Programme 1967-71

	1967	1968	1969	1970	1971
Bafatá	-	-	-	13 671	32 872
Bissau	4 168	12 821	2 351	36 449	5 705
Bolama	-	-	-	3 788	-
Buba	-	-	333	-	-
Cacheu	-	1 981	1 562	23 094	1 214
Gabú	-	8 565	-	28 182	-
Oio	-	13 452	-	18 674	-
Tombali	-	-	-	3 564	-
TOTAL	[2]* 4 168	36 819	4 246	127 422	39 791

1.3 Surveillance-containment programme

1.3.1 Number of units providing weekly reports.
Very irregularly, the units indicated in 1.1.2.

1.3.2 Method of reporting: reporting forms.
From outlying to regional and thence to central level.

1.3.3 Number of smallpox cases reported by sectors and region by month and year (1967-71).
Nil. The last seven cases were reported in 1962.
The last suspect case was reported in 1966.

* See original, which has this figure (apparently unintentional). Translator.

- 1.3.4 Villages or towns which reported one or more cases of smallpox in 1969/1970.
None.
- 1.3.5 Epidemiological information on last two outbreaks.
None.

PART 2 - SURVEILLANCE AND VACCINATION PROGRAMME (1972/1975)

2.1 Surveillance Programme

- 2.1.1 Number and category of reporting units by sector and region.
The health units specified in 1.1.2.
- 2.1.2 Regularity of reporting, including nil report.
Very irregular, sometimes non-existent.
- 2.1.3 Line listing of reported suspect cases: Nil.
- 2.1.4 Line listing of deaths due to chicken pox.
The existing statistical situation gives the following picture:

	<u>Cases</u>	<u>Deaths</u>
1972	186	0
1973	94	0
1974	230	0

2.2 Vaccination Programme (1972 to present)

- 2.2.1 Brief description of programme, including number of vaccinations performed each year.

Since 1972, smallpox vaccinations have been performed only in the city of Bissau, and on a very small scale:

1972	4 399	vaccinations
1973	6 750	"
1974	7 677	"
